

**UNITED STATES DISTRICT COURT
DISTRICT OF SOUTH CAROLINA
AIKEN DIVISION**

CHITANIA FRIERSON, *on behalf of
herself and all others similarly situated,*

Plaintiff,

v.

SRP FEDERAL CREDIT UNION,

Defendant.

Case No. 1:24-cv-07538-CMC

CLASS ACTION COMPLAINT

JURY TRIAL DEMANDED

Chitania Frierson (“Plaintiff”) brings this Class Action Complaint against SRP Federal Credit Union (“Defendant” or “SRPFCU”), on behalf of herself and all others similarly situated (“Class Members”), and alleges, upon personal knowledge as to her own actions and her counsels’ investigations, and upon information and belief as to all other matters, as follows:

NATURE OF THE ACTION

1. Plaintiff Frierson brings this action against Defendant SRPCFU for various acts and omissions related to its failure to properly secure and safeguard personally identifiable information (“PII”)¹ including, but not limited to, Plaintiff and Class Members’ names, dates of birth, Social Security numbers, and financial account numbers.

¹ Personally identifiable information generally incorporates information that can be used to distinguish or trace an individual’s identity, either alone or when combined with other personal or identifying information. 2 C.F.R. § 200.79. At a minimum, it includes all information that on its face expressly identifies an individual. PII also is generally defined to include certain identifiers that do not on its face name an individual, but that are considered to be particularly sensitive and/or valuable if in the wrong hands (for example, Social Security numbers, passport numbers, driver’s license numbers, financial account numbers).

2. Defendant is a credit union headquartered in North Augusta, South Carolina. Defendant provides financial services including savings programs, checking accounts, and loans to over 195,000 of its members.

3. Defendant operates 12 branch locations in South Carolina and 8 branch locations in Georgia.

4. To provide these financial services, and in the ordinary course of Defendant's business, Defendant acquires, possesses, analyzes, and otherwise utilizes Plaintiff's and putative Class Members' PII.

5. With this action, Plaintiff seeks to hold Defendant responsible for the harms it caused and will continue to cause Plaintiff and other similarly situated persons in the substantial and preventable cyberattack purportedly that occurred between September 5, 2024 and November 4, 2024, whereby cybercriminals infiltrated Defendant's inadequately protected network and accessed and exfiltrated highly sensitive, unencrypted PII belonging to Plaintiff and Class Members which was being kept unprotected (the "Data Breach").

6. Plaintiff further seeks to hold Defendant responsible for not ensuring that Defendant maintained the PII in a manner consistent with industry standards.

7. On or about December 12, 2024, Defendant notified state Attorneys General and many Class Members about the widespread Data Breach (the "Notice Letter").²

8. While Data Breach Began in early September 5, 2024, Defendant did not begin informing victims of the Data Breach until December 12, 2024, over three months later. Indeed,

² Sample Notice Letter may be accessed through the Office of the Maine Attorney General, <https://www.maine.gov/agviewer/content/ag/985235c7-cb95-4be2-8792-a1252b4f8318/10844f64-85d5-4b49-b683-f9ba718f60a7.html> (last visited December 22, 2024).

Plaintiff and Class Members were wholly unaware of the Data Breach until they received Notice Letters from Defendant in mid-December 2024. During this time, Plaintiff and Class Members were unaware that their sensitive PII had been compromised, and that they were, and continue to be, at present and significantly increased risk of identity theft and various other forms of personal, social, and financial harm.

9. The Notice Letter provides general information about the Data Breach and only recommends how victims can place a fraud alert or credit freeze on their account and how to sign up for the temporary, non-automatic identity monitoring services Defendant offered in response to the Data Breach. The Notice Letter does not explain whether Plaintiff's and Class Members' PII remains in the possession of criminals.

10. The cybercriminal ransomware group named Nitrogen has claimed credit for the Data Breach.³ Nitrogen disclosed a sample of the documents and PII exfiltrated from SRPFCU's systems.⁴

11. By acquiring, utilizing, and benefiting from Plaintiff's and Class Members' PII for its business purposes, Defendant owed or otherwise assumed common law, contractual, and statutory duties that extended to Plaintiff and Class Members. These duties required Defendant to design and implement adequate data security systems to protect Plaintiff's and Class Members' PII in its possession and to keep Plaintiff's and Class Members' PII confidential, safe, secure, and protected from unauthorized disclosure, access, dissemination, or theft.

³ <https://www.cutimes.com/2024/12/16/ransomware-gang-claims-srp-federal-credit-union-data-breach-hack/?slreturn=20241222-25922> (last visited December 22, 2024).

⁴ See <https://x.com/H4ckManac/status/1864733526576222355/photo/1> (last visited on December 22, 2024).

12. Defendant breached these duties by failing to implement adequate data security measures and protocols to properly safeguard and protect Plaintiff's and Class Members' PII from a foreseeable cyberattack on its systems that resulted in the unauthorized access and theft of Plaintiff's and Class Members' PII.

13. Currently, the full extent of the types of PII, the scope of the breach, and the root cause of the Data Breach are all within the exclusive control of Defendant, its agents, counsel, and forensic security vendors at this phase of the litigation.

14. Defendant disregarded the rights of Plaintiff and Class Members by intentionally, willfully, recklessly, and/or negligently failing to take and implement adequate and reasonable measures to ensure that the PII of Plaintiff and Class Members was safeguarded, failing to take available steps to prevent an unauthorized disclosure of data, and failing to follow applicable, required, and appropriate protocols, policies and procedures regarding the encryption of data, even for internal use. As a result, the Plaintiff's and Class Members' PII was compromised through disclosure to an unknown and unauthorized criminal third party.

15. Upon information and belief, Defendant breached its duties and obligations in one or more of the following ways: (1) failing to design, implement, monitor, and maintain reasonable network safeguards against foreseeable threats; (2) failing to design, implement, and maintain reasonable data retention policies; (3) failing to adequately train staff on data security; (4) failing to comply with industry-standard data security practices; (5) failing to warn Plaintiff and Class Members of Defendant's inadequate data security practices; (6) failing to encrypt or adequately encrypt the PII; (7) failing to recognize or detect that its network had been compromised and accessed in a timely manner to mitigate the harm; (8) failing to utilize widely available software able to detect and prevent this type of attack, and (9) otherwise failing to secure the hardware using

reasonable and effective data security procedures free of foreseeable vulnerabilities and data security incidents.

16. Based on the type of sophisticated and targeted criminal activity, the type of PII involved, and Defendant's admission that the PII was accessed, it can be concluded that the unauthorized criminal third party was able to successfully target Plaintiff's and Class Members' PII, infiltrate and gain access to Defendant's network, and exfiltrate Plaintiff's and Class Members' PII, including, but not limited to, their names and Social Security numbers for the purposes of utilizing or selling the PII for use in future fraud and identity theft related cases.

17. As a result of Defendant's failures and the Data Breach, Plaintiff's and Class Members' identities are now at a current and substantial imminent and ongoing risk of identity theft and shall remain at risk for the rest of their lives.

18. As Defendant instructed, advised, and warned in its Notice Letter discussed below, Plaintiff and Class Members must now closely monitor their financial accounts to guard against future identity theft and fraud. Plaintiff and Class Members have heeded such warnings to mitigate against the imminent risk of future identity theft and financial loss. Such mitigation efforts included and will include into the future: (a) reviewing financial statements; (b) changing passwords; and (c) signing up for credit and identity theft monitoring services. The loss of time and other mitigation costs are tied directly to guarding against and mitigating against the imminent risk of identity theft.

19. Plaintiff and Class Members have suffered numerous actual and concrete injuries as a direct result of the Data Breach, including: (a) financial costs incurred mitigating the materialized risk and imminent threat of identity theft; (b) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft; (c) financial costs

incurred due to actual identity theft; (d) loss of time incurred due to actual identity theft; (e) loss of time heeding Defendant's warnings and following its instructions in the Notice Letter; (g) deprivation of value of their PII; (h) invasions of their privacy; and (i) the continued risk to their PII, which remains in the possession of Defendant, and which is subject to further breaches, so long as Defendant fail to undertake appropriate and adequate measures to protect it.

20. Plaintiff brings this action on behalf of all persons whose PII was compromised due to Defendant's failure to adequately protect Plaintiff's and Class Members' PII. Accordingly, Plaintiff brings this action against Defendant seeking redress for its unlawful conduct and asserts claims on behalf of the Class for Negligence, Breach of Implied Contract, Unjust Enrichment, and violations of South Carolina's Data Breach Statutes.

PARTIES

21. Plaintiff Chitania Frierson is an adult individual and, at all relevant times herein, a resident and citizen of the state of South Carolina, residing in Graniteville, South Carolina (Aiken County).

22. Plaintiff Frierson is a current or former customer of Defendant and at the time of the Data Breach, Defendant maintained Plaintiff Frierson's PII in its system.

23. Plaintiff Frierson received a Notice Letter dated December 12, 2024, on or about that date, informing her that Defendant had experienced a Data Breach and that Plaintiff's PII compromised in the Data Breach.

24. Defendant SRP Federal Credit Union has a principal place of business at 1070 Edgefield Road, North Augusta, South Carolina 29860.

JURISDICTION AND VENUE

25. This Court has subject matter jurisdiction over this action under 28 U.S.C. § 1332(d) because this is a class action wherein the amount in controversy exceeds the sum or value of \$5,000,000, exclusive of interest and costs, there are more than 100 members in the proposed class, and at least one member of the class, is a citizen of a state different from Defendant, given that Defendant has numerous branch locations in South Carolina and Georgia.

26. This Court has general personal jurisdiction over Defendant SRPFCU because Defendant's principal place of business is in this District and the acts and omissions giving rise to Plaintiff's claims occurred in and emanated from this District.

27. Venue is proper under 18 U.S.C. § 1391(b)(1) because Defendant's principal place of business is in this District.

FACTUAL ALLEGATIONS***Background***

28. Defendant's Privacy Policy, posted on its website, states that "[t]o protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings."⁵ This Policy discloses that SRPFCU collects and stores information when customers/members open an account or deposit money, pay bills or apply for loans, and/or use debit or credit cards.⁶

Defendant Acquires, Collects, and Stores the PII of Plaintiff and Class Members

29. In the ordinary course of its business, SRPFCU maintains the PII of its customers'

⁵ *Privacy Notice*, <https://srpfcu.org/your-credit-union/policies/privacy-notice/> (last visited December 22, 2024).

⁶ *Id.*

current and past employees, customers/members, customers, and others including but not limited to their names, dates of birth, Social Security numbers, and financial account information.

30. Because of the highly sensitive and personal nature of the information Defendant acquires and stores with respect to customers/members, Defendant, upon information and belief, promises to, among other things: keep PII private; comply with insurance industry standards related to data security and PII, inform customers and members of its legal duties and comply with all federal and state laws protecting PII; and, provide adequate notice to individuals if their PII is disclosed without authorization.

31. At every step, Defendant holds Plaintiff's and Class Members' sensitive PII and has a duty to protect that PII from unauthorized access.

32. By obtaining, collecting, using, and deriving a benefit from Plaintiff's and Class Members' PII, Defendant assumed legal and equitable duties and knew or should have known that It was responsible for protecting Plaintiff's and Class Members' PII from unauthorized disclosure.

33. Plaintiff and the Class Members have taken reasonable steps to maintain the confidentiality of their PII.

34. Plaintiff and Class Members relied on Defendant to implement and follow adequate data security policies and protocols, to keep their PII confidential and securely maintained, to use their PII solely for proper business services and purposes, and to prevent the unauthorized disclosure of their PII.

The Cyberattack and Data Breach

35. On or after November 4, 2024, SRPFCU detected unauthorized access to its

computer system. The unauthorized access was the result of a cybersecurity incident.⁷

36. Through its investigation, SRPFCU determined that its network and computer system were subject to a cyberattack that impacted its network resulting in information on its network and computer systems being accessed and acquired without authorization.⁸

37. SRPFCU America engaged forensic security firm and took “steps to reduce the risk of this type of incident occurring in the future, including enhancing [SRPFCU]’s technical security measures.”⁹

38. The Notice Letter Plaintiff Frierson received stated: “On November 22, 2024, it was determined that the involved filed contained person information that included your name, date of birth, Social Security numbers, and financial account number.”

39. Furthermore, SRPFCU’s investigation determined that the accessed systems contained PII. Upon information and belief, this PII was accessible, unencrypted, unprotected, and vulnerable to acquisition and/or exfiltration by the unauthorized actor.

40. Defendant had obligations created by contract, industry standards, common law, and its own promises and representations to keep Plaintiff’s and Class Members’ PII confidential and to protect it from unauthorized access and disclosure.

41. Plaintiff and Class Members provided their PII to directly, or indirectly, to Defendant with the reasonable expectation and mutual understanding that Defendant would comply with its obligations to keep such information confidential and secure from unauthorized access.

⁷ See Notice Letter.

⁸ *Id.*

⁹ *Id.*

42. Through its Notice Letter, SRPFCU also recognized the actual imminent harm and injury that flowed from the Data Breach, so it encouraged breach victims to take steps to mitigate their risk of identity theft.

43. SRPFCU has offered temporary, non-automatic credit monitoring services to victims thereby identifying the harm posed to Plaintiff and Class Members as a result of the Data Breach, which does not adequately address the lifelong harm that victims face following the Data Breach. Indeed, the Data Breach involves PII that cannot be changed, such as Social Security numbers.

44. As a result of the Data Breach, Plaintiff and thousands of Class Members suffered ascertainable losses in the form of the loss of the benefit of their bargain, out-of-pocket expenses, and the value of their time reasonably incurred to remedy or mitigate the effects of the attack and the substantial and imminent risk of identity theft.

45. Defendant's failure to timely detect and report the Data Breach made its customers/members vulnerable to identity theft without any warnings to monitor their financial accounts or credit reports to prevent unauthorized use of their PII.

46. This PII was compromised due to Defendant's negligent and/or careless acts and omissions and the failure to protect the PII of Plaintiff and Class Members.

47. Despite recognizing its duty to do so, on information and belief, Defendant has not implemented reasonably cybersecurity safeguards or policies to protect its customers/members' PII or trained its IT or data security employees to prevent, detect, and stop breaches of its systems. As a result, Defendant leaves significant vulnerabilities in its systems for cybercriminals to exploit and gain access to Plaintiff and Class Members' PII.

48. Plaintiff and Class Members directly or indirectly entrusted Defendant with

sensitive and confidential information, including their PII which includes information that is static, does not change, and can be used to commit myriad financial crimes.

49. Plaintiff and Class Members relied on Defendant to keep their PII confidential and securely maintained, to use their PII for authorized purposes only, and to make only authorized disclosures of this information. Plaintiff and Class Members demand Defendant safeguard their PII.

50. The unencrypted PII of Plaintiff and Class Members will likely end up for sale on the dark web as that is the *modus operandi* of hackers. Indeed, Nitrogen, at minimum, has posted samples of the PII online. Additionally, unencrypted PII may fall into the hands of companies that will use the detailed PII for targeted marketing without the approval of Plaintiff and Class Members. In turn, unauthorized individuals can easily access the Plaintiff and Class Members' PII.

51. Defendant did not use reasonable security procedures and practices appropriate to the nature of the sensitive, unencrypted information they were maintaining for Plaintiff and Class Members, causing the exposure of PII.

The Data Breach Was Foreseeable

52. Defendant's data security obligations were particularly important given the substantial increase in cyberattacks and/or data breaches in the finance industry preceding the date of the breach.

53. In light of recent high profile data breaches at other financial companies, SRPFCU knew or should have known that its electronic records and the PII that it stored and maintained would be targeted by cybercriminals and ransomware attack groups.

54. In 2021, a record 1,862 data breaches occurred, resulting in approximately

293,927,708 sensitive records being exposed, a 68% increase from 2020.¹⁰

55. Indeed, cyberattacks on financial companies like SRPFCU have become so notorious that the FBI and U.S. Secret Service have issued a warning to potential targets, so they are aware of, and prepared for, potential attack.¹¹

56. Generally, “[c]ybercriminals choose their targets based on two conditions – maximum impact and maximum profit . . . [f]inancial institutions perfectly meet these conditions because they store highly valuable data, and their digital transformation efforts are creating greater opportunities for cyber attackers to access that data.”¹²

Defendant Had an Obligation to Protect the PII

57. Defendant’s failure to adequately secure Plaintiff’s and Class Members’ PII breaches duties it owes Plaintiff and Class Members under statutory and common law. Moreover, Plaintiff and Class Members surrendered their highly sensitive personal data to Defendant under the implied condition that Defendant would keep it private and secure. Accordingly, Defendant also has an implied duty to safeguard their data, independent of any statute.

58. Defendant was prohibited by the Federal Trade Commission Act (the “FTC Act”) (15 U.S.C. § 45) from engaging in “unfair or deceptive acts or practices in or affecting commerce.” The Federal Trade Commission (the “FTC”) has concluded that a company’s failure to maintain reasonable and appropriate data security for consumers’ sensitive personal information is an

¹⁰ See 2021 Data Breach Annual Report, ITRC 6 (Jan. 2022), available at <https://www.idtheftcenter.org/notified> (last visited December 22, 2024).

¹¹ FBI, Secret Service Warn of Targeted, Law360 (Nov. 18, 2019), <https://www.law360.com/articles/1220974/fbi-secret-service-warn-of-targeted-ransomware> (last visited December 21, 2024).

¹² Edward Kost, 10 Biggest Data Breach in Finance [Updated August 2022], UpGuard, (Ma. 2, 2023), <https://www.upguard.com/blog/biggest-data-breaches-financial-services> (last visited December 21, 2024).

“unfair practice” in violation of the FTC Act. *See, e.g., FTC v. Wyndham Worldwide Corp.*, 799 F.3d 236 (3d Cir. 2015).

59. Therefore, the increase in such attacks, and attendant risk of future attacks, was widely known to the public and to anyone in Defendant’s industry, including Defendant.

60. In addition to its obligations under federal and state laws, Defendant owed a duty to Plaintiff and Class Members to exercise reasonable care in obtaining, retaining, securing, safeguarding, deleting, and protecting the PII in Defendant’s possession from being compromised, lost, stolen, accessed, and misused by unauthorized persons. Defendant owed a duty to Plaintiff and Class Members to provide reasonable security, including consistency with industry standards and requirements, and to ensure that its computer systems, networks, and protocols adequately protected the PII of Plaintiff and Class Members.

61. Defendant owed a duty to Plaintiff and Class Members to design, maintain, and test its computer systems, servers, and networks to ensure that the PII in its possession was adequately secured and protected.

62. Defendant owed a duty to Plaintiff and Class Members to create and implement reasonable data security practices and procedures to protect the PII in its possession, including not sharing information with other entities who maintained substandard data security systems.

63. Defendant owed a duty to Plaintiff and Class Members to implement processes that would immediately detect a breach on its data security systems in a timely manner.

64. Defendant owed a duty to Plaintiff and Class Members to act upon data security warnings and alerts in a timely fashion.

65. Defendant owed a duty to Plaintiff and Class Members to disclose if its computer systems and data security practices were inadequate to safeguard individuals’ PII from theft

because such an inadequacy would be a material fact in the decision to entrust this PII to Defendant.

66. Defendant owed a duty of care to Plaintiff and Class Members because they were foreseeable and probable victims of any inadequate data security practices.

67. Defendant owed a duty to Plaintiff and Class Members to encrypt and/or more reliably encrypt Plaintiff's and Class Members' PII and monitor user behavior and activity in order to identify possible threats.

68. At all relevant times, Defendant knew, or reasonably should have known, of the importance of safeguarding the PII of Plaintiff and Class Members and the foreseeable consequences that would occur if Defendant's data security system was breached, including, specifically, the significant costs that would be imposed on Plaintiff and Class Members as a result of a breach.

69. Defendant was, or should have been, fully aware of the unique type and the significant volume of data on Defendant's network, amounting to, at least, tens of thousands of individuals' PII, and, thus, the significant number of individuals who would be harmed by the exposure of the unencrypted data.

Value of PII

70. The PII of individuals remains of high value to criminals, as evidenced by the prices criminals will pay through the Dark Web. Numerous sources cite Dark Web pricing for stolen identity credentials. For example, personal information can be sold at a price ranging from \$40 to \$200, and bank details have a price range of \$50 to \$200.¹³ Experian reports that a stolen credit or

¹³ Anita George, *Your personal data is for sale on the dark web. Here's how much it costs*, Digital

debit card number can sell for \$5 to \$110 on the dark web.¹⁴ Criminals can also purchase access to entire company data breaches from \$900 to \$4,500.¹⁵

71. Based on the foregoing, the information compromised in the Data Breach, including full names matched with Social Security numbers, is significantly more valuable than the loss of, for example, credit card information in a retailer data breach because, there, victims can cancel or close credit and debit card accounts. The information compromised in this Data Breach is impossible to “close” and difficult, if not impossible, to change.

72. This data demands a much higher price on the black market. Martin Walter, senior director at cybersecurity firm RedSeal, explained, “Compared to credit card information, personally identifiable information and Social Security numbers are worth more than 10x on the black market.”¹⁶

73. Among other forms of fraud, identity thieves may obtain driver’s licenses, government benefits, medical services, and housing or even give false information to police.

74. The fraudulent activity resulting from the Data Breach may not come to light for years as there may be a time lag between when harm occurs versus when it is discovered, and also between when the PII is stolen and when it is used. According to the U.S. Government

Trends (Oct. 16, 2019), <https://www.digitaltrends.com/computing/personal-data-sold-on-the-dark-web-how-much-it-costs/> (last visited December 22, 2024).

¹⁴ Brian Stack, *Here’s How Much Your Personal Information Is Selling for on the Dark Web*, Experian (Dec. 6, 2017), <https://www.experian.com/blogs/ask-experian/heres-how-much-your-personal-information-is-selling-for-on-the-dark-web/> (last visited December 22, 2024).

¹⁵ *In the Dark*, VPNOVerview, 2019, available at: <https://vpnoverview.com/privacy/anonymous-browsing/in-the-dark/> (last visited December 22, 2024).

¹⁶ Time Greene, *Anthem Hack: Personal Data Stolen Sells for 10x Price of Stolen Credit Card Numbers*, IT World, (Feb. 6, 2015), available at: <https://www.networkworld.com/article/2880366/anthem-hack-personal-data-stolen-sells-for-10x-price-of-stolen-credit-card-numbers.html> (last visited December 22, 2024).

Accountability Office (“GAO”), which conducted a study regarding data breaches:

[L]aw enforcement officials told us that in some cases, stolen data may be held for up to a year or more before being used to commit identity theft. Further, once stolen data has been sold or posted on the Web, fraudulent use of that information may continue for years. As a result, studies that attempt to measure the harm resulting from data breaches cannot necessarily rule out all future harm.¹⁷

75. At all relevant times, Defendant knew, or reasonably should have known, of the importance of safeguarding the PII of Plaintiff and Class Members, including Social Security numbers, and of the foreseeable consequences that would occur if Defendant’s data security system was breached, including, specifically, the significant costs that would be imposed on Plaintiff and Class Members as a result of a breach.

76. Plaintiff and Class Members now face a lifetime of constant surveillance of their financial and personal records, credit monitoring, and loss of rights. Class Members are incurring and will continue to incur such damages in addition to any fraudulent use of their PII.

77. Defendant has acknowledged the risk and harm caused to Plaintiff and Class Members as a result of the Data Breach. Defendant, to date, has offered Plaintiff and Class Members temporary, non-automatic credit monitoring services. The limited credit monitoring is inadequate to protect Plaintiff and Class Members from the threats they face for years to come, particularly in light of the PII at issue here. Moreover, Defendant put the burden squarely on Plaintiff and Class Members to enroll in the inadequate monitoring services.

Defendant Failed to Properly Protect Plaintiff’s and Class Members’ PII

78. Defendant could have prevented this Data Breach by properly securing and encrypting the systems containing the PII of Plaintiff and Class Members. Alternatively,

¹⁷ Report to Congressional Requesters, GAO, at 29 (June 2007), available at: <https://www.gao.gov/assets/gao-07-737.pdf> (last visited December 22, 2024).

Defendant could have destroyed the data, especially for individuals with whom it had not had a relationship for a period of time.

79. Defendant's negligence in safeguarding the PII of Plaintiff and Class Members is exacerbated by the repeated warnings and alerts directed to companies like Defendant to protect and secure sensitive data they possess.

80. Despite the prevalence of public announcements of data breach and data security compromises, Defendant failed to take appropriate steps to protect the PII of Plaintiff and Class Members from being compromised.

81. The Federal Trade Commission ("FTC") defines identity theft as "a fraud committed or attempted using the identifying information of another person without authority." The FTC describes "identifying information" as "any name or number that may be used, alone or in conjunction with any other information, to identify a specific person," including, among other things, "[n]ame, Social Security number, date of birth, official State or government issued driver's license or identification number, alien registration number, government passport number, employer or taxpayer identification number."¹⁸

82. The ramifications of Defendant's failure to keep secure the PII of Plaintiff and Class Members are long lasting and severe. Once PII is stolen, fraudulent use of that information and damage to victims may continue for their respective lifetimes.

83. To prevent and detect unauthorized cyber-attacks, Defendant could and should have implemented, as recommended by the United States Government, the following measures:

- Implement an awareness and training program. Because end users are

¹⁸ See generally *Fighting Identity Theft With the Red Flags Rule: A How-To Guide for Business*, FED. TRADE COMM., <https://www.ftc.gov/business-guidance/resources/fighting-identity-theft-red-flags-rule-how-guide-business> (last visited December 22, 2024).

targets, employees and individuals should be aware of the threat of ransomware and how it is delivered.

- Enable strong spam filters to prevent phishing emails from reaching the end users and authenticate inbound email using technologies like Sender Policy Framework (SPF), Domain Message Authentication Reporting and Conformance (DMARC), and DomainKeys Identified Mail (DKIM) to prevent email spoofing.
- Scan all incoming and outgoing emails to detect threats and filter executable files from reaching end users.
- Configure firewalls to block access to known malicious IP addresses.
- Patch operating systems, software, and firmware on devices. Consider using a centralized patch management system.
- Set anti-virus and anti-malware programs to conduct regular scans automatically.
- Manage the use of privileged accounts based on the principle of least privilege: no users should be assigned administrative access unless absolutely needed; and those with a need for administrator accounts should only use them when necessary.
- Configure access controls—including file, directory, and network share permissions—with least privilege in mind. If a user only needs to read specific files, the user should not have write access to those files, directories, or shares.
- Disable macro scripts from office files transmitted via email. Consider using Office Viewer software to open Microsoft Office files transmitted via email instead of full office suite applications.
- Implement Software Restriction Policies (SRP) or other controls to prevent programs from executing from common ransomware locations, such as temporary folders supporting popular Internet browsers or compression/decompression programs, including the AppData/LocalAppData folder.
- Consider disabling Remote Desktop protocol (RDP) if it is not being used.
- Use application whitelisting, which only allows systems to execute programs known and permitted by security policy.
- Execute operating system environments or specific programs in a

virtualized environment.

- Categorize data based on organizational value and implement physical and logical separation of networks and data for different organizational units.¹⁹

84. To prevent and detect cyber-attacks, including the cyber-attack that resulted in the Data Breach, Defendant could and should have implemented, as recommended by the United States Cybersecurity & Infrastructure Security Agency, the following measures:

- **Update and patch your computer.** Ensure your applications and operating systems (OSs) have been updated with the latest patches. Vulnerable applications and OSs are the target of most ransomware attacks....
- **Use caution with links and when entering website addresses.** Be careful when clicking directly on links in emails, even if the sender appears to be someone you know. Attempt to independently verify website addresses (e.g., contact your organization's helpdesk, search the internet for the sender organization's website or the topic mentioned in the email). Pay attention to the website addresses you click on, as well as those you enter yourself. Malicious website addresses often appear almost identical to legitimate sites, often using a slight variation in spelling or a different domain (e.g., .com instead of .net)....
- **Open email attachments with caution.** Be wary of opening email attachments, even from senders you think you know, particularly when attachments are compressed files or ZIP files.
- **Keep your personal information safe.** Check a website's security to ensure the information you submit is encrypted before you provide it....
- **Verify email senders.** If you are unsure whether or not an email is legitimate, try to verify the email's legitimacy by contacting the sender directly. Do not click on any links in the email. If possible, use a previous (legitimate) email to ensure the contact information you have for the sender is authentic before you contact them.
- **Inform yourself.** Keep yourself informed about recent cybersecurity threats and up to date on ransomware techniques. You can find information about known phishing attacks on the Anti-Phishing Working Group website. You may also want to sign up for CISA product notifications, which will alert you when a new Alert, Analysis Report, Bulletin, Current Activity, or Tip has been published.
- **Use and maintain preventative software programs.** Install antivirus software, firewalls, and email filters—and keep them updated—to reduce malicious network

¹⁹ *Id.* at 3-4.

traffic....²⁰

85. To prevent and detect cyber-attacks, including the cyber-attack that resulted in the Data Breach, Defendant could and should have implemented, as recommended by the Microsoft Threat Protection Intelligence Team, the following measures:

Secure internet-facing assets

- Apply latest security updates;
- Use threat and vulnerability management;
- Perform regular audit; remove privileged credentials;

Thoroughly investigate and remediate alerts

- Prioritize and treat commodity malware infections as potential full compromise;

Include IT Pros in security discussions

- Ensure collaboration among [security operations], [security admins], and [information technology] admins to configure servers and other endpoints securely;

Build credential hygiene

- Use [multifactor authentication] or [network level authentication] and use strong, randomized, just-in-time local admin passwords;

Apply principle of least-privilege

- Monitor for adversarial activities;
- Hunt for brute force attempts;
- Monitor for cleanup of Event Logs;
- Analyze logon events;

Harden infrastructure

- Use Windows Defender Firewall;
- Enable tamper protection;

²⁰ See Security Tip (ST19-001) Protecting Against Ransomware (original release date Apr. 11, 2019), available at <https://www.cisa.gov/news-events/news/protecting-against-ransomware> (last visited December 22, 2024).

- Enable cloud-delivered protection;
- Turn on attack surface reduction rules and [Antimalware Scan Interface] for Office [Visual Basic for Applications].²¹

86. Moreover, given that Defendant was storing the PII of Plaintiff and Class Members, Defendant could and should have implemented all of the above measures to prevent and detect cyberattacks.

87. The occurrence of the Data Breach indicates that Defendant failed to adequately implement one or more of the above measures to prevent cyberattacks, resulting in the Data Breach and the exposure of the PII of Plaintiff and Class Members.

88. As a result of computer systems in need of security upgrades, inadequate procedures for handling email phishing attacks, viruses, malignant computer code, hacking attacks, Defendant negligently and unlawfully failed to safeguard Plaintiff's and Class Members' PII.

89. Because Defendant failed to properly protect and safeguard Plaintiff's and Class Members' PII, an unauthorized third party was able to access Defendant's network, and access Defendant's database and system configuration files and exfiltrate that data.

Defendant Failed to Comply with Industry Standards

90. As shown above, experts studying cyber security routinely identify financial services providers as being particularly vulnerable to cyberattacks because of the value of the PII which they collect and maintain.

91. Several best practices have been identified that at a minimum should be implemented by financial services providers like Defendant, including, but not limited to:

²¹ See *Human-operated ransomware attacks: A preventable disaster*, Microsoft (Mar. 5, 2020). <https://www.microsoft.com/security/blog/2020/03/05/human-operated-ransomware-attacks-a-preventable-disaster/> (last visited December 22, 2024).

educating all employees; strong passwords; multi-layer security, including firewalls, anti-virus, and anti-malware software; encryption, making data unreadable without a key; multi-factor authentication; backup data; and limiting which employees can access sensitive data.

92. Other best cybersecurity practices that are standard in the financial services industry include installing appropriate malware detection software; monitoring and limiting the network ports; protecting web browsers and email management systems; setting up network systems such as firewalls, switches, and routers; monitoring and protection of physical security systems; protection against any possible communication system; and training staff regarding critical points.

93. Defendant failed to meet the minimum standards of any of the following frameworks: the NIST Cybersecurity Framework Version 1.1 (including without limitation PR.AC-1, PR.AC-3, PR.AC-4, PR.AC-5, PR.AC-6, PR.AC-7, PR.AT-1, PR.DS-1, PR.DS-5, PR.PT-1, PR.PT-3, DE.CM-1, DE.CM-4, DE.CM-7, DE.CM-8, and RS.CO-2), and the Center for Internet Security's Critical Security Controls (CIS CSC), which are all established standards in reasonable cybersecurity readiness.

94. The foregoing frameworks are existing and applicable industry standards in the financial services industry, and Defendant failed to comply with these accepted standards, thereby opening the door to and causing the Data Breach.

95. Upon information and belief, Defendant failed to comply with one or more of the foregoing industry standards.

Defendant's Negligent Acts and Breaches

96. Defendant participated in and controlled the process of gathering the PII from Plaintiff and Class Members.

97. Defendant therefore assumed and otherwise owed duties and obligations to Plaintiff

and Class Members to take reasonable measures to protect the information, including the duty of oversight, training, instruction, testing of the data security policies and network systems. Defendant breached these obligations to Plaintiff and Class Members and/or was otherwise negligent because it failed to properly implement data security systems and policies for its network that would adequately safeguard Plaintiff's and Class Members' PII. Upon information and belief, Defendant's unlawful conduct included, but is not limited to, one or more of the following acts and/or omissions:

- a. Failing to design and maintain an adequate data security system to reduce the risk of data breaches and protect Plaintiff's and Class Members' PII;
- b. Failing to properly monitor its data security systems for data security vulnerabilities and risk;
- c. Failing to test and assess the adequacy of its data security system;
- d. Failing to develop adequate training programs related to the proper handling of emails and email security practices;
- e. Failing to put into develop and place uniform procedures and data security protections for its network;
- f. Failing to adequately fund and allocate resources for the adequate design, operation, maintenance, and updating necessary to meet industry standards for data security protection;
- g. Failing to ensure or otherwise require that it was compliant with FTC guidelines for cybersecurity;
- h. Failing to ensure or otherwise require that it was adhering to one or more of industry standards for cybersecurity discussed above;
- i. Failing to implement or update antivirus and malware protection software in need of security updating;
- j. Failing to require encryption or adequate encryption on its data systems;
- k. Otherwise negligently and unlawfully failing to safeguard Plaintiff's and Class Members' PII provided to Defendant, which in turn allowed cyberthieves to access

its IT systems.

COMMON INJURIES & DAMAGES

98. As result of Defendant's ineffective and inadequate data security practices, Plaintiff and Class Members now face a present and ongoing risk of fraud and identity theft.

99. Due to the Data Breach, and the foreseeable consequences of PII ending up in the possession of criminals, the risk of identity theft to Plaintiff and Class Members has materialized and is imminent, and Plaintiff and Class Members have all sustained actual injuries and damages, including: (a) invasion of privacy; (b) "out of pocket" costs incurred mitigating the materialized risk and imminent threat of identity theft; (c) loss of time and loss of productivity incurred mitigating the materialized risk and imminent threat of identity theft risk; (d) "out of pocket" costs incurred due to actual identity theft; (e) loss of time incurred due to actual identity theft; (f) loss of time due to increased spam and targeted marketing emails; (g) the loss of benefit of the bargain (price premium damages); (h) diminution or loss of value of their PII; and (i) the continued risk to their PII, which remains in Defendant's possession, and which is subject to further breaches, so long as Defendant fail to undertake appropriate and adequate measures to protect Plaintiff's and Class Members' PII.

The Risk of Identity Theft to Plaintiff and Class Members Is Present and Ongoing

100. The link between a data breach and the risk of identity theft is simple and well established. Criminals acquire and steal PII to monetize the information. Criminals monetize the data by selling the stolen information on the black market to other criminals who then utilize the information to commit a variety of identity theft related crimes discussed below.

101. Because a person's identity is akin to a puzzle with multiple data points, the more accurate pieces of data an identity thief obtains about a person, the easier it is for the thief to take

on the victim's identity – or track the victim to attempt other hacking crimes against the individual to obtain more data to perfect a crime.

102. For example, armed with just a name and date of birth, a data thief can utilize a hacking technique referred to as “social engineering” to obtain even more information about a victim’s identity, such as a person’s login credentials or Social Security number. Social engineering is a form of hacking whereby a data thief uses previously acquired information to manipulate and trick individuals into disclosing additional confidential or personal information through means such as spam phone calls and text messages or phishing emails. Data breaches are often the starting point for these additional targeted attacks on the victims.

103. The Dark Web is an unindexed layer of the internet that requires special software or authentication to access.²² Criminals in particular favor the dark web as it offers a degree of anonymity to visitors and website publishers. Unlike the traditional or ‘surface’ web, Dark Web users need to know the web address of the website they wish to visit in advance. For example, on the surface web, the CIA’s web address is cia.gov, but on the dark web the CIA’s web address is ciadotgov4sjwlzihbbgxnqg3xiyrg7so2r2o3lt5wz5ypk4sxyjstad.onion.²³ This prevents Dark Web marketplaces from being easily monitored by authorities or accessed by those not in the know.

104. A sophisticated black market exists on the dark web where criminals can buy or sell malware, firearms, drugs, and frequently, personal and medical information like the PII at issue here.²⁴ The digital character of PII stolen in data breaches lends itself to dark web transactions

²²Louis DeNicola, *What Is the Dark Web?*, Experian (May 12, 2021), <https://www.experian.com/blogs/ask-experian/what-is-the-dark-web/> (last visited December 22, 2024).

²³ *Id.*

²⁴ *What is the Dark Web?* – Microsoft 365 (July 15, 2022), <https://www.microsoft.com/en>

because it is immediately transmissible over the internet and the buyer and seller can retain their anonymity. The sale of a firearm or drugs on the other hand requires a physical delivery address. Nefarious actors can readily purchase usernames and passwords for online streaming services, stolen financial information and account login credentials, and Social Security numbers, dates of birth, and medical information.²⁵ As Microsoft warns “[t]he anonymity of the dark web lends itself well to those who would seek to do financial harm to others.”²⁶

105. Social Security numbers, for example, are among the worst kind of personal information to have stolen because they may be put to numerous serious fraudulent uses and are difficult for an individual to change. The Social Security Administration stresses that the loss of an individual’s Social Security number, as is the case here, can lead to identity theft and extensive financial fraud:

A dishonest person who has your Social Security number can use it to get other personal information about you. Identity thieves can use your number and your good credit to apply for more credit in your name. Then, they use the credit cards and don’t pay the bills, it damages your credit. You may not find out that someone is using your number until you’re turned down for credit, or you begin to get calls from unknown creditors demanding payment for items you never bought. Someone illegally using your Social Security number and assuming your identity can cause a lot of problems.²⁷

What’s more, it is no easy task to change or cancel a stolen Social Security number. An individual cannot obtain a new Social Security number without significant paperwork and evidence of actual misuse. In other words, preventive action to defend against the possibility of misuse of a Social Security number is not permitted; an individual must show evidence of actual, ongoing fraud activity to obtain a new number.

[us/microsoft-365-life-hacks/privacy-and-safety/what-is-the-dark-web](https://www.microsoft.com/life-hacks/privacy-and-safety/what-is-the-dark-web) (last visited December 22, 2024).

²⁷ Social Security Administration, *Identity Theft and Your Social Security Number* (2021), available at: <https://www.ssa.gov/pubs/EN-05-10064.pdf> (last visited December 22, 2024).

106. Even then, new Social Security number may not be effective, as “[t]he credit bureaus and banks are able to link the new number very quickly to the old number, so all of that old bad information is quickly inherited into the new Social Security number.”²⁸

107. Identity thieves can also use Social Security numbers to obtain a driver’s license or official identification card in the victim’s name but with the thief’s picture; use the victim’s name and Social Security number to obtain government benefits; or file a fraudulent tax return using the victim’s information. In addition, identity thieves may obtain a job using the victim’s Social Security number, rent a house or receive medical services in the victim’s name, and may even give the victim’s personal information to police during an arrest resulting in an arrest warrant being issued in the victim’s name. And the Social Security Administration has warned that identity thieves can use an individual’s Social Security number to apply for additional credit lines.²⁹

108. According to the FBI’s Internet Crime Complaint Center (IC3) 2019 Internet Crime Report, Internet-enabled crimes reached their highest number of complaints and dollar losses that year, resulting in more than \$3.5 billion in losses to individuals and business victims.³⁰

109. Further, according to the same report, “rapid reporting can help law enforcement stop fraudulent transactions before a victim loses the money for good.”³¹ Defendant did not rapidly report to Plaintiff and Class Members that their PII had been stolen.

110. Victims of identity theft also often suffer embarrassment, blackmail, or harassment

²⁸ Brian Naylor, *Victims of Social Security Number Theft Find It’s Hard to Bounce Back*, NPR (Feb. 9, 2015), <http://www.npr.org/2015/02/09/384875839/data-stolen-by-anthem-s-hackers-has-millions-worrying-about-identity-theft> (last visited December 22, 2024).

²⁹ *Identity Theft and Your Social Security Number*, Social Security Administration, 1 (2021), <https://www.ssa.gov/pubs/EN-05-10064.pdf> (last visited December 22, 2024).

³⁰ See 2019 Internet Crime Report, FBI (Feb. 11, 2020), <https://www.fbi.gov/news/stories/2019-internet-crime-report-released-021120> (last visited December 22, 2024).

³¹ *Id.*

in person or online, and/or experience financial losses resulting from fraudulently opened accounts or misuse of existing accounts.

111. In addition to out-of-pocket expenses that can exceed thousands of dollars and the emotional toll identity theft can take, some victims have to spend a considerable time repairing the damage caused by the theft of their PII. Victims of new account identity theft will likely have to spend time correcting fraudulent information in their credit reports and continuously monitor their reports for future inaccuracies, close existing bank/credit accounts, open new ones, and dispute charges with creditors.

112. Further complicating the issues faced by victims of identity theft, data thieves may wait years before attempting to use the stolen PII. To protect themselves, Plaintiff and Class Members will need to remain vigilant against unauthorized data use for years or even decades to come.

113. The Federal Trade Commission (“FTC”) has also recognized that consumer data is a new and valuable form of currency. In an FTC roundtable presentation, former Commissioner Pamela Jones Harbour stated that “most consumers cannot begin to comprehend the types and amount of information collected by businesses, or why their information may be commercially valuable. Data is currency. The larger the data set, the greater potential for analysis and profit.”³²

114. The FTC has also issued numerous guidelines for businesses that highlight the importance of reasonable data security practices. The FTC has noted the need to factor data security into all business decision-making. According to the FTC, data security requires: (1)

³² Statement of FTC Commissioner Pamela Jones Harbour (Remarks Before FTC Exploring Privacy Roundtable), FTC (Dec. 7, 2009), <http://www.ftc.gov/speeches/harbour/091207privacyroundtable.pdf> (last visited December 22, 2024).

encrypting information stored on computer networks; (2) retaining payment card information only as long as necessary; (3) properly disposing of personal information that is no longer needed; (4) limiting administrative access to business systems; (5) using industry-tested and accepted methods for securing data; (6) monitoring activity on networks to uncover unapproved activity; (7) verifying that privacy and security features function properly; (8) testing for common vulnerabilities; and (9) updating and patching third-party software.³³

115. According to the FTC, unauthorized PII disclosures are extremely damaging to consumers' finances, credit history and reputation, and can take time, money, and patience to resolve the fallout. The FTC treats the failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data as an unfair act or practice prohibited by Section 5(a) of the FTC Act.³⁴

116. Defendant's failure to properly notify Plaintiff and Class Members of the Data Breach exacerbated Plaintiff's and Class Members' injury by depriving them of the earliest ability to take appropriate measures to protect their PII and take other necessary steps to mitigate the harm caused by the Data Breach.

Loss of Time to Mitigate the Risk of Identity Theft and Fraud

117. As a result of the recognized risk of identity theft, when a Data Breach occurs, and an individual is notified by a company that their PII was compromised, as in this Data Breach, the reasonable person is expected to take steps and spend time to address the dangerous situation, learn

³³ See generally <https://www.ftc.gov/business-guidance/resources/protecting-personal-information-guide-business> (last visited December 22, 2024).

³⁴ See, e.g., *Protecting Personal Information: A Guide for Business*, FTC, <https://www.ftc.gov/news-events/news/press-releases/2016/07/commission-finds-labmd-liable-unfair-data-security-practices> (last visited December 22, 2024).

about the breach, and otherwise mitigate the risk of becoming a victim of identity theft or fraud. Failure to spend time taking steps to review accounts or credit reports could expose the individual to greater financial harm – yet, the resource and asset of time has been lost.

118. Thus, due to Defendant's admitted recognition of the actual and imminent risk of identity theft, Defendant offered Plaintiff and Class Members abbreviated, non-automatic credit monitoring services.

119. Plaintiff and Class Members have spent, and will spend additional time in the future, on a variety of prudent actions, such as placing “freezes” and “alerts” with credit reporting agencies, contacting financial institutions, closing or modifying financial accounts, changing passwords, reviewing and monitoring credit reports and accounts for unauthorized activity, and filing police reports, which may take years to discover and detect.

120. Plaintiff's mitigation efforts are consistent with the U.S. Government Accountability Office that released a report in 2007 regarding data breaches (“GAO Report”) in which it noted that victims of identity theft will face “substantial costs and time to repair the damage to their good name and credit record.”³⁵

121. Plaintiff's mitigation efforts are also consistent with the steps that FTC recommends that data breach victims take to protect their personal and financial information after a data breach, including: contacting one of the credit bureaus to place a fraud alert (and consider an extended fraud alert that lasts for seven years if someone steals their identity), reviewing their credit reports, contacting companies to remove fraudulent charges from their accounts, placing a

³⁵ See U.S. GOV'T ACCOUNTABILITY OFF., GAO-07-737, PERSONAL INFORMATION: DATA BREACHES ARE FREQUENT, BUT EVIDENCE OF RESULTING IDENTITY THEFT IS LIMITED; HOWEVER, THE FULL EXTENT IS UNKNOWN (2007) (“GAO Report”), available at <https://www.gao.gov/new.items/d07737.pdf> (last visited December 22, 2024).

credit freeze on their credit, and correcting their credit reports.³⁶

122. A study by Identity Theft Resource Center shows the multitude of harms caused by fraudulent use of personal and financial information:³⁷

123. Indeed, the FTC recommends that identity theft victims take several steps and spend time to protect their personal and financial information after a data breach, including contacting one of the credit bureaus to place a fraud alert (consider an extended fraud alert that lasts for 7 years if someone steals their identity), reviewing their credit reports, contacting companies to remove fraudulent charges from their accounts, placing a credit freeze on their credit, and

correcting their credit reports.³⁸

Diminution of Value of the PII

124. PII is a valuable property right.³⁹ Its value is axiomatic, considering the value of Big Data in corporate America and the consequences of cyber thefts include heavy prison sentences. Even this obvious risk to reward analysis illustrates beyond doubt that PII has considerable market value.

125. PII can sell for as much as \$363 per record according to the Infosec Institute.⁴⁰

126. An active and robust legitimate marketplace for PII also exists. In 2019, the data brokering industry was worth roughly \$200 billion.⁴¹ In fact, the data marketplace is so sophisticated that consumers can actually sell their non-public information directly to a data broker who in turn aggregates the information and provides it to marketers or app developers.^{42, 43} Consumers who agree to provide their web browsing history to the Nielsen Corporation can receive up to \$50.00 a year.⁴⁴

127. As a result of the Data Breach, Plaintiff's and Class Members' PII, which has an

³⁸ See Federal Trade Commission, IdentityTheft.gov, <https://www.identitytheft.gov/Steps> (last visited December 22, 2024).

³⁹ See, e.g., John T. Soma, et al, Corporate Privacy Trend: The “Value” of Personally Identifiable Information (“PII”) Equals the “Value” of Financial Assets, 15 Rich. J.L. & Tech. 11, at *3-4 (2009) (“PII, which companies obtain at little cost, has quantifiable value that is rapidly reaching a level comparable to the value of traditional financial assets.”) (citations omitted).

⁴⁰ See Ashiq Ja, *Hackers Selling Healthcare Data in the Black Market*, InfoSec (July 27, 2015), <https://resources.infosecinstitute.com/topic/hackers-selling-healthcare-data-in-the-black-market/> (last visited December 22, 2024).

⁴⁴ Nielsen Computer & Mobile Panel, Frequently Asked Questions, available at <https://computermobilepanel.nielsen.com/ui/US/en/faqen.html> (last visited December 22, 2024).

inherent market value in both legitimate and dark markets, has been damaged and diminished in its value by its unauthorized and potential release onto the Dark Web, where it may soon be available and holds significant value for the threat actors.

Future Cost of Credit and Identity Theft Monitoring Is Reasonable and Necessary

128. To date, Defendant has done little to provide Plaintiff and Class Members with relief for the damages they have suffered as a result of the Data Breach.

129. The abbreviated, non-automatic credit monitoring offered to persons whose PII was compromised is wholly inadequate as it fails to provide for the fact that victims of data breaches and other unauthorized disclosures commonly face ongoing identity theft and financial fraud for the remainder of their lives. Defendant also places the burden squarely on Plaintiff and Class Members by requiring them to independently sign up for that service, as opposed to automatically enrolling all victims of this Data Breach.

130. Given the type of targeted attack in this case and sophisticated criminal activity, the type of PII, and the *modus operandi* of cybercriminals, there is a strong probability that entire batches of stolen information have been placed, or will be placed, on the black market/Dark Web for sale and purchase by criminals intending to utilize the PII for identity theft crimes – e.g., opening bank accounts in the victims' names to make purchases or to launder money; file false tax returns; take out loans or lines of credit; or file false unemployment claims.

131. It must be noted there may be a substantial time lag – measured in years – between when harm occurs versus when it is discovered, and also between when PII and/or financial information is stolen and when it is used.

132. Such fraud may go undetected until debt collection calls commence months, or even

years, later. An individual may not know that his or her Social Security Number was used to file for unemployment benefits until law enforcement notifies the individual's employer of the suspected fraud. Fraudulent tax returns are typically discovered only when an individual's authentic tax return is rejected.

133. Furthermore, the information accessed and disseminated in the Data Breach is significantly more valuable than the loss of, for example, credit card information in a retailer data breach, where victims can easily cancel or close credit and debit card accounts.⁴⁵ The information disclosed in this Data Breach is impossible to "close" and difficult, if not impossible, to change (such as Social Security numbers).

134. Consequently, Plaintiff and Class Members are at a present and ongoing risk of fraud and identity theft for many years into the future.

135. The retail cost of credit monitoring and identity theft monitoring can cost around \$200 a year, or more, per Class Member. This is a reasonable and necessary cost to protect Class Members from the risk of identity theft that arose from Defendant's Data Breach. This is a future cost for a minimum of five years that Plaintiff and Class Members would not need to bear but for Defendant's failure to safeguard their PII.

Injunctive Relief Is Necessary to Protect against Future Data Breaches

136. Moreover, Plaintiff and Class Members have an interest in ensuring that their PII, which is believed to remain in the possession of Defendant, is protected from further breaches by the implementation of security measures and safeguards, including but not limited to, making sure

⁴⁵ See Jesse Damiani, *Your Social Security Number Costs \$4 On The Dark Web, New Report Finds*, FORBES (Mar. 25, 2020), <https://www.forbes.com/sites/jessedamiani/2020/03/25/your-social-security-number-costs-4-on-the-dark-web-new-report-finds/?sh=6a44b6d513f1> (last visited December 22, 2024).

that the storage of data or documents containing PII is not accessible online and that access to such data is password protected.

Plaintiff Frierson's Allegations

137. As a result of the Data Breach, Plaintiff Frierson spent time dealing with the consequences of the Data Breach. This time has been spent updating account passwords and login credentials, reviewing credit reports and account statements, researching the data breach and in the information compromised therein, and taking other necessary steps to try and protect herself. This time has been lost forever and cannot be recaptured. Moreover, this time was spent at Defendant's direction by way of the Notice Letter where Defendant advised Plaintiff Frierson to mitigate her damages by, among other things, freezing her credit reports and monitoring her accounts for fraudulent activity.

138. Plaintiff Frierson is a cautious person and is therefore careful about sharing her sensitive PII. As a result, she has never knowingly transmitted unencrypted sensitive PII over the internet or any other unsecured source. Plaintiff Frierson stores any documents containing her PII in a safe and secure location or destroys the documents.

139. As a result of the Data Breach, Plaintiff Frierson has also received a notable increase in the amount of spam she has been receiving, both by phone and email. These spam messages are a consistent disruption and take additional time and energy to recognize and deal with appropriately.

140. The Data Breach has caused Plaintiff Frierson to suffer imminent and impending injury arising from the substantially increased risk of additional future fraud, identity theft, and misuse resulting from her PII being placed in the hands of criminals.

141. As a result of the actual harm Plaintiff Frierson has already suffered, and the

substantial present risk of additional harm that she will face the rest of her life, Plaintiff Frierson spent valuable time freezing her credit reports with all three major credit bureaus.

142. The loss of privacy and substantial present risk of additional imminent harm have both caused Plaintiff Frierson to suffer stress, fear, and anxiety as Plaintiff Frierson is very concerned that her sensitive PII is now in the hands of data thieves and shall remain that way for the remainder of her lifetime and there is nothing Plaintiff Frierson can do to retrieve her stolen PII from the cyber-criminals.

143. Plaintiff Frierson is aware of no other source from which the theft of her PII could have come. She regularly takes steps to safeguard her own PII in her own control.

144. Given the time Plaintiff Frierson has lost investigating this data breach, taking steps to understand its full scope, determining the appropriate remedial steps, contacting counsel, etc., coupled with Plaintiff Frierson's resultant and naturally foreseeable fears/concerns for the use of Plaintiff Frierson's valuable PII, the damages articulated more specifically above are far from the full extent of the harm thereto.

CLASS ALLEGATIONS

145. Plaintiff brings this nationwide class action on behalf of themselves and on behalf of others similarly situated pursuant to Rule 23(b)(2), 23(b)(3), and 23(c)(4) of the Federal Rules of Civil Procedure.

146. The Class that Plaintiff seeks to represent is defined as follows:

All individuals whose PII who were sent a Notice Letter by Defendant notifying them that their PII was actually or potentially accessed or acquired during the Data Breach (the "Class").

147. Excluded from the Class are the following individuals and/or entities: Defendant and Defendant's parents, subsidiaries, affiliates, and any entity in which Defendant has a

controlling interest; all individuals who make a timely election to be excluded from this proceeding using the correct protocol for opting out; any and all federal, state or local governments, including but not limited to their departments, agencies, divisions, bureaus, boards, sections, groups, counsels and/or subdivisions; and all judges assigned to hear any aspect of this litigation, as well as their immediate family members.

148. Plaintiff reserves the right to modify or amend the definition of the proposed class before the Court determines whether certification is appropriate.

149. Numerosity, Fed R. Civ. P. 23(a)(1): Class Members are so numerous that joinder of all members is impracticable. Upon information and belief, there at least 240,000 individuals who were notified by Defendant of the Data Breach. The identities of Class Members is ascertainable through Defendant's records, Class Members' records, publication notice, self-identification, and other means.

150. Commonality, Fed. R. Civ. P. 23(a)(2) and (b)(3): Questions of law and fact common across Class Members exist and predominate over any questions affecting only individual Class Members. These include:

- a. Whether and to what extent Defendant had a duty to protect the PII of Plaintiff and Class Members;
- b. Whether Defendant had duties not to disclose the PII of Plaintiff and Class Members to unauthorized third parties;
- c. Whether Defendant had duties not to use the PII of Plaintiff and Class Members for non-business purposes;
- d. Whether Defendant failed to adequately safeguard the PII of Plaintiff and Class Members;

- e. Whether and when Defendant actually learned of the Data Breach;
- f. Whether Defendant adequately, promptly, and accurately informed Plaintiff and Class Members that their PII had been compromised;
- g. Whether Defendant violated the law by failing to promptly notify Plaintiff and Class Members that their PII had been compromised;
- h. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;
- i. Whether Defendant adequately addressed and fixed the vulnerabilities which permitted the Data Breach to occur;
- j. Whether Defendant engaged in unfair, unlawful, or deceptive practices by failing to safeguard the PII of Plaintiff and Class Members;
- k. Whether Plaintiff and Class Members are entitled to actual, consequential, and/or nominal damages as a result of Defendant's wrongful conduct;
- l. Whether Plaintiff and Class Members are entitled to restitution as a result of Defendant's wrongful conduct; and
- m. Whether Plaintiff and Class Members are entitled to injunctive relief to redress the imminent and currently ongoing harm faced as a result of the Data Breach.

151. Typicality, Fed. R. Civ. P. 23(a)(3): Plaintiff's claims are typical of those of other Class Members because all had their PII compromised as a result of the Data Breach, due to Defendant's misfeasance.

152. Policies Generally Applicable to the Class: This class action is also appropriate for certification because Defendant has acted or refused to act on grounds generally applicable to the

Class, thereby requiring the Court's imposition of uniform relief to ensure compatible standards of conduct toward the Class Members and making final injunctive relief appropriate with respect to the Class as a whole. Defendant's policies challenged herein apply to and affect Class Members uniformly and Plaintiff's challenge of these policies hinges on Defendant's conduct with respect to the Class as a whole, not on facts or law applicable only to Plaintiff.

153. Adequacy, Fed. R. Civ. P. 23(a)(4): Plaintiff will fairly and adequately represent and protect the interests of the Class Members in that Plaintiff has no disabling conflicts of interest that would be antagonistic to those of the other Members of the Class. Plaintiff seeks no relief that is antagonistic or adverse to the Members of the Class and the infringement of the rights and the damages Plaintiff has suffered are typical of other Class Members. Plaintiff has also retained counsel experienced in complex class action litigation, and Plaintiff intends to prosecute this action vigorously.

154. Superiority and Manageability, Fed. R. Civ. P. 23(b)(3): Class litigation is an appropriate method for fair and efficient adjudication of the claims involved. Class action treatment is superior to all other available methods for the fair and efficient adjudication of the controversy alleged herein; it will permit a large number of Class Members to prosecute their common claims in a single forum simultaneously, efficiently, and without the unnecessary duplication of evidence, effort, and expense that hundreds of individual actions would require. Class action treatment will permit the adjudication of relatively modest claims by certain Class Members, who could not individually afford to litigate a complex claim against large corporations, like Defendant. Further, even for those Class Members who could afford to litigate such a claim, it would still be economically impractical and impose a burden on the courts.

155. The nature of this action and the nature of laws available to Plaintiff and Class

Members make the use of the class action device a particularly efficient and appropriate procedure to afford relief to Plaintiff and Class Members for the wrongs alleged because Defendant would necessarily gain an unconscionable advantage since they would be able to exploit and overwhelm the limited resources of each individual Class Member with superior financial and legal resources; the costs of individual suits could unreasonably consume the amounts that would be recovered; proof of a common course of conduct to which Plaintiff was exposed is representative of that experienced by the Class and will establish the right of each Class Member to recover on the cause of action alleged; and individual actions would create a risk of inconsistent results and would be unnecessary and duplicative of this litigation.

156. The litigation of the claims brought herein is manageable. Defendant's uniform conduct, the consistent provisions of the relevant laws, and the ascertainable identities of Class Members demonstrate that there would be no significant manageability problems with prosecuting this lawsuit as a class action.

157. Adequate notice can be given to Class Members directly using information maintained in Defendant's records.

158. Unless a Class-wide injunction is issued, Defendant may continue in its failure to properly secure the PII of Class Members, Defendant may continue to refuse to provide proper notification to Class Members regarding the Data Breach, and Defendant may continue to act unlawfully as set forth in this Complaint.

159. Further, Defendant has acted or refused to act on grounds generally applicable to the Classes and, accordingly, final injunctive or corresponding declaratory relief with regard to the Class Members as a whole is appropriate under Rule 23(b)(2) of the Federal Rules of Civil Procedure.

160. Likewise, particular issues under Rule 23(c)(4) are appropriate for certification because such claims present only particular, common issues, the resolution of which would advance the disposition of this matter and the parties' interests therein. Such particular issues include, but are not limited to:

- a. Whether Defendant owed a legal duty to Plaintiff and Class Members to exercise due care in collecting, storing, using, and safeguarding their PII;
- b. Whether Defendant breached a legal duty to Plaintiff and Class Members to exercise due care in collecting, storing, using, and safeguarding their PII;
- c. Whether Defendant failed to comply with its own policies and applicable laws, regulations, and industry standards relating to data security;
- d. Whether an implied contract existed between Defendant on the one hand, and Plaintiff and Class Members on the other, and the terms of that implied contract;
- e. Whether Defendant breached the implied contract;
- f. Whether Defendant adequately and accurately informed Plaintiff and Class Members that their PII had been compromised;
- g. Whether Defendant failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;
- h. Whether Defendant engaged in unfair, unlawful, or deceptive practices by failing to safeguard the PII of Plaintiff and Class Members;
- i. Whether Class Members are entitled to actual, consequential, and/or nominal damages, and/or injunctive relief as a result of Defendant's wrongful conduct.

CAUSES OF ACTION

COUNT I
NEGLIGENCE
(On Behalf of Plaintiff and the Class)

161. Plaintiff re-alleges and incorporates by reference herein all of the allegations contained in 1 through 160.

162. Plaintiff and the Class entrusted Defendant with their PII.

163. Plaintiff and the Class entrusted their PII to Defendant on the premise and with the understanding that Defendant would safeguard their information, use their PII for business purposes only, and/or not disclose their PII to unauthorized third parties.

164. Defendant has full knowledge of the sensitivity of the PII and the types of harm that Plaintiff and the Class could and would suffer if the PII were wrongfully disclosed.

165. Defendant knew or reasonably should have known that the failure to exercise due care in the collecting, storing, and using of the PII of Plaintiff and the Class involved an unreasonable risk of harm to Plaintiff and the Class, even if the harm occurred through the criminal acts of a third party.

166. Defendant had a duty to exercise reasonable care in safeguarding, securing, and protecting such information from being compromised, lost, stolen, misused, and/or disclosed to unauthorized parties. This duty includes, among other things, designing, maintaining, and testing Defendant's security protocols to ensure that the PII of Plaintiff and the Class in Defendant's possession was adequately secured and protected.

167. Defendant also had a duty to exercise appropriate clearinghouse practices to remove PII it was no longer required to retain.

168. Defendant also had a duty to have procedures in place to detect and prevent the improper access and misuse of the PII of Plaintiff and the Class.

169. Defendant's duty to use reasonable security measures arose as a result of the special relationship that existed between Defendant and Plaintiff and the Class. That special relationship arose because Plaintiff and the Class entrusted Defendant, either directly or indirectly, with their confidential PII, a necessary part of obtaining financial services from Defendant.

170. Defendant was subject to an "independent duty," untethered to any contract between Defendant and Plaintiff or the Class.

171. A breach of security, unauthorized access, and resulting injury to Plaintiff and the Class was reasonably foreseeable, particularly in light of Defendant's inadequate security practices.

172. Plaintiff and the Class were the foreseeable and probable victims of any inadequate security practices and procedures. Defendant knew or should have known of the inherent risks in collecting and storing the PII of Plaintiff and the Class, the critical importance of providing adequate security of that PII, and the necessity for encrypting PII stored on Defendant's systems.

173. Defendant's own conduct created a foreseeable risk of harm to Plaintiff and the Class. Defendant's misconduct included, but was not limited to, its failure to take the steps and opportunities to prevent the Data Breach as set forth herein. Defendant's misconduct also included its decisions not to comply with industry standards for the safekeeping of the PII of Plaintiff and the Class, including basic encryption techniques freely available to Defendant.

174. Plaintiff and the Class had no ability to protect their PII that was in, and possibly remains in, Defendant's possession.

175. Defendant was in a position to protect against the harm suffered by Plaintiff and the Class as a result of the Data Breach.

176. Defendant had and continues to have a duty to adequately disclose that the PII of

Plaintiff and the Class within Defendant's possession might have been compromised, how it was compromised, and precisely the types of data that were compromised and when. Such notice was necessary to allow Plaintiff and the Class to take steps to prevent, mitigate, and repair any identity theft and the fraudulent use of their PII by third parties.

177. Defendant had a duty to employ proper procedures to prevent the unauthorized dissemination of the PII of Plaintiff and the Class.

178. Defendant has admitted that the PII of Plaintiff and the Class was wrongfully lost and disclosed to unauthorized third persons as a result of the Data Breach.

179. Defendant, through its actions and/or omissions, unlawfully breached its duties to Plaintiff and the Class by failing to implement industry protocols and exercise reasonable care in protecting and safeguarding the PII of Plaintiff and the Class during the time the PII was within Defendant's possession or control.

180. Defendant improperly and inadequately safeguarded the PII of Plaintiff and the Class in deviation of standard industry rules, regulations, and practices at the time of the Data Breach.

181. Defendant failed to heed industry warnings and alerts to provide adequate safeguards to protect the PII of Plaintiff and the Class in the face of increased risk of theft.

182. Defendant, through its actions and/or omissions, unlawfully breached its duty to Plaintiff and the Class by failing to have appropriate procedures in place to detect and prevent dissemination of PII.

183. Defendant breached its duty to exercise appropriate clearinghouse practices by failing to remove PII, they were no longer required to retain pursuant to regulations.

184. Defendant, through its actions and/or omissions, unlawfully breached its duty to

adequately and timely disclose to Plaintiff and the Class the existence and scope of the Data Breach.

185. But for Defendant's wrongful and negligent breach of duties owed to Plaintiff and the Nationwide Class, the PII of Plaintiff and the Class would not have been compromised.

186. There is a close causal connection between Defendant's failure to implement security measures to protect the PII of Plaintiff and the Class and the harm, or risk of imminent harm, suffered by Plaintiff and the Nationwide Class. The PII of Plaintiff and the Class was lost and accessed as the proximate result of Defendant's failure to exercise reasonable care in safeguarding such PII by adopting, implementing, and maintaining appropriate security measures.

187. Additionally, Section 5 of the FTC Act prohibits "unfair . . . practices in or affecting commerce," including, as interpreted and enforced by the FTC, the unfair act or practice by businesses, such as Defendant, of failing to use reasonable measures to protect PII. The FTC publications and orders described above also form part of the basis of Defendant's duty in this regard.

188. Defendant violated Section 5 of the FTC Act by failing to use reasonable measures to protect PII and not complying with applicable industry standards, as described in detail herein. Defendant's conduct was particularly unreasonable given the nature and amount of PII it obtained and stored and the foreseeable consequences of the immense damages that would result to Plaintiff and the Class.

189. Defendant's violation of Section 5 of the FTC Act and of South Carolina's Data Breach Statute constitutes negligence *per se*.

190. Plaintiff and the Class are within the class of persons that the FTC Act was intended to protect.

191. The harm that occurred as a result of the Data Breach is the type of harm the FTC Act was intended to guard against. The FTC has pursued enforcement actions against businesses, which, as a result of its failure to employ reasonable data security measures and avoid unfair and deceptive practices, caused the same harm as that suffered by Plaintiff and the Class.

192. As a direct and proximate result of Defendant's negligence, Plaintiff and the Class have suffered and will suffer injury, including but not limited to: (i) actual identity theft; (ii) the loss of the opportunity of how their PII is used; (iii) the compromise, publication, and/or theft of their PII; (iv) out-of-pocket expenses associated with the prevention, detection, and recovery from identity theft, tax fraud, and/or unauthorized use of their PII; (v) lost opportunity costs associated with effort expended and the loss of productivity addressing and attempting to mitigate the present and continuing consequences of the Data Breach, including but not limited to efforts spent researching how to prevent, detect, contest, and recover from tax fraud and identity theft; (vi) costs associated with placing freezes on credit reports; (vii) the continued risk to their PII, which remain in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII of Plaintiff and the Class; and (viii) present and continuing costs in terms of time, effort, and money that has been and will be expended to prevent, detect, contest, and repair the impact of the PII compromised as a result of the Data Breach for the remainder of the lives of Plaintiff and the Class.

193. As a direct and proximate result of Defendant's negligence, Plaintiff and the Class have suffered and will continue to suffer other forms of injury and/or harm, including, but not limited to, anxiety, emotional distress, loss of privacy, and other economic and non-economic losses.

194. Additionally, as a direct and proximate result of Defendant's negligence, Plaintiff

and the Class have suffered and will suffer the continued risks of exposure of their PII, which remain in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII in its continued possession.

195. As a direct and proximate result of Defendant's negligence, Plaintiff and the Class are entitled to recover actual, consequential, and nominal damages.

COUNT II
BREACH OF IMPLIED CONTRACT
(On behalf of Plaintiff and the Putative Nationwide Rule 23 Class)

196. Plaintiff re-alleges and incorporates by reference herein all of the allegations contained in 1 through 160.

197. Plaintiff and the Class entrusted their PII to Defendant. In so doing, Plaintiff and the Class entered into implied contracts with Defendant by which Defendant agreed to safeguard and protect such information, to keep such information secure and confidential, and to timely and accurately notify Plaintiff and the Class if their data had been breached and compromised or stolen.

198. In its Privacy Policy, Defendant represented that it would not disclose Plaintiff's and Class Members' PII to unauthorized third parties.

199. Plaintiff and the Class fully performed their obligations under the implied contracts with Defendant.

200. Defendant breached the implied contracts they made with Plaintiff and the Class by failing to safeguard and protect their personal information, by failing to delete the information of Plaintiff and the Class once the relationship ended, and by failing to provide timely and accurate notice to them that personal information was compromised as a result of the Data Breach.

201. As a direct and proximate result of Defendant's above-described breach of implied

contract, Plaintiff and the Class have suffered (and will continue to suffer) ongoing, imminent, and impending threat of identity theft crimes, fraud, and abuse, resulting in monetary loss and economic harm; actual identity theft crimes, fraud, and abuse, resulting in monetary loss and economic harm; loss of the confidentiality of the stolen confidential data; the illegal sale of the compromised data on the dark web; expenses and/or time spent on credit monitoring and identity theft insurance; time spent scrutinizing bank statements, credit card statements, and credit reports; expenses and/or time spent initiating fraud alerts, decreased credit scores and ratings; lost work time; and other economic and non-economic harm.

202. As a direct and proximate result of Defendant's above-described breach of implied contract, Plaintiff and the Class are entitled to recover actual, consequential, and nominal damages.

COUNT III
UNJUST ENRICHMENT
(On behalf of Plaintiff and the Class)

203. Plaintiff re-alleges and incorporates by reference herein all of the allegations contained in 1 through 160. Notwithstanding, Plaintiff brings this claim in the alternative to any claim for breach of contractual obligations.

204. Defendant benefited from receiving Plaintiff's and Class Members' PII by its ability to retain and use that information for its own benefit. Defendant understood this benefit.

205. Defendant enriched itself by saving the costs they reasonably should have expended on data security measures to secure Plaintiff's and Class Members' PII.

206. Defendant was also enriched from the value of Plaintiff's and Class Members' PII. PII has independent value as a form of intangible property. Defendant also derives value from this information because it allows Defendant to operate its business and generate revenue.

207. Instead of providing a reasonable level of security that would have prevented the

Data Breach, Defendant instead calculated to avoid its data security obligations at the expense of Plaintiff and Class Members by utilizing cheaper, ineffective security measures. Plaintiff and Class Members, on the other hand, suffered as a direct and proximate result of Defendant's failure to provide the requisite security.

208. Under the principles of equity and good conscience, Defendant should not be permitted to retain the monetary value of the benefit belonging to Plaintiff and Class Members, because Defendant failed to implement appropriate data management and security measures that are mandated by industry standards.

209. Defendant acquired the monetary benefit and PII through inequitable means in that they failed to disclose the inadequate security practices previously alleged.

210. If Plaintiff and Class Members knew that Defendant had not secured their PII, they would not have agreed to provide their PII to Defendant.

211. Plaintiff and Class Members have no adequate remedy at law.

212. As a direct and proximate result of Defendant's conduct, Plaintiff and Class Members have suffered and will suffer injury, including but not limited to: (i) actual identity theft; (ii) the loss of the opportunity how their PII is used; (iii) the compromise, publication, and/or theft of their PII; (iv) out-of-pocket expenses associated with the prevention, detection, and recovery from identity theft, and/or unauthorized use of their PII; (v) lost opportunity costs associated with effort expended and the loss of productivity addressing and attempting to mitigate the actual and future consequences of the Data Breach, including but not limited to efforts spent researching how to prevent, detect, contest, and recover from identity theft; (vi) the continued risk to their PII, which remains in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII in their

continued possession and (vii) future costs in terms of time, effort, and money that will be expended to prevent, detect, contest, and repair the impact of the PII compromised as a result of the Data Breach for the remainder of the lives of Plaintiff and Class Members.

213. As a direct and proximate result of Defendant's conduct, Plaintiff and Class Members have suffered and will continue to suffer other forms of injury and/or harm.

214. Defendant should be compelled to disgorge into a common fund or constructive trust, for the benefit of Plaintiff and Class Members, proceeds that it unjustly received from them.

COUNT IV
VIOLATION OF SOUTH CAROLINA STATE DATA BREACH STATUTES
(On behalf of Plaintiff and the Class)

215. Plaintiff re-alleges and incorporates by reference herein all of the allegations contained in 1 through 160.

216. Defendant owns, licenses and/or maintains computerized data that includes Plaintiff's and Class Members' Private Information.

217. As an credit union, Defendant "maintains" Plaintiff's and Class Members' Private Information as defined in S.C. Code § 39-1-90(B).

218. Defendant's conduct, as alleged above, violated the data breach statutes of South Carolina, including, S.C. Code § 1-11-490 (2008) and/or S.C. Code § 39-1-90 (2009) (the "State Data Breach Acts").

219. Defendant was required, but failed, to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the cyber security incident described herein.

220. The Data Breach constituted a "breach of the security system" within the meaning of the State Data Breach Acts. The information compromised in the Data Breach constituted

“personal identifying information” within the meaning of the State Data Breach Acts.

221. The State Data Breach Acts require disclosure of data breaches “in the most expedient time possible and without unreasonable delay....”

222. Defendant violated the State Data Breach Acts by unreasonably delaying disclosure of the Data Breach to Plaintiff and other Class Members, whose Private Information was, or was reasonably believed to have been, acquired by an unauthorized person.

223. Specifically, Defendant learned of the Data Breach on or around September 5, 2024, but waited more than three months, until on or around December 12, 2024, to notify Plaintiff and Class Members.

224. Upon information and belief, no law enforcement agency instructed Defendant that notification to Plaintiff and Class Members would impede a criminal investigation.

225. As a result of Defendant’s violation of the State Data Breach Acts, Plaintiff and Class Members incurred damages as alleged herein.

226. Plaintiff, individually and on behalf of the Class, seek all remedies available under the State Data Breach Acts, including, but not limited to: (a) actual damages suffered by Class Members as alleged above; (b) statutory damages for Defendant’s willful, intentional, and/or reckless conduct; (c) equitable relief; and (d) reasonable attorneys’ fees and costs.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays for judgment as follows:

- A. For an Order certifying this action as a class action and appointing Plaintiff and her counsel to represent the Class;
- B. For equitable relief enjoining Defendant from engaging in the wrongful conduct complained of herein pertaining to the misuse and/or disclosure of Plaintiff’s and

Class Members' Private Information, and from refusing to issue prompt, complete and accurate disclosures of its Data Breach to Plaintiffs and Class Members;

- C. For equitable relief compelling Defendant to utilize appropriate methods and policies with respect to PII collection, storage, and safety, and to disclose with specificity the types of Private Information compromised during the Data Breach;
- D. For equitable relief requiring restitution and disgorgement of the revenues wrongfully retained as a result of Defendant's wrongful conduct;
- E. For declaratory relief as requested;
- F. Ordering Defendant to pay for lifetime credit monitoring services for Plaintiff and the Class;
- G. For an award of actual damages, nominal damages, compensatory damages, and statutory damages, in an amount to be determined, as allowable by law;
- H. For an award of attorneys' fees and costs, and any other expense, including expert witness fees;
- I. Pre- and post-judgment interest on any amounts awarded; and
- J. Such other and further relief as this Court may deem just and proper.

DEMAND FOR JURY TRIAL

Plaintiff hereby demands that this matter be tried before a jury.

Date: December 23, 2024

Respectfully Submitted,

/s/ Paul Doolittle
